

POWERCAP™ Stealth 2575 Vs. Competition

Functionality:

- Twice the light output
- 3 Times the battery Life (4 batteries vs. 2)
 - Patented Under Brim lighting for close up work to long distance lighting
 - Two 3 mm LEDs at 25 degrees for close up task lighting
 - Two 5 mm LEDs at 7.5 degrees for medium & distance lighting

Design Aspects:

- Performance wicking sweatband versus cotton sweatband.
- No LED's in the brim means LED's are not noticeable when not in use.
- When talking to other people you do not blind them at close range.
- Batteries are completely enclosed for consumer safety unlike our competition.
- One piece wiring construction versus their plug in battery pack means a more reliable product.
- Mechanical on/off switch tested to over 50,000 cycles vs. cheaper, less reliable electronic switch used by the competition.

Packaging:

- Patented Brim Sleeve that allows hats to be decorated but is easily removed at home with no adhesive residue like our competition.

We **VIGOROUSLY** defend our patents to keep cheap knockoffs out of the market place.
